Name:○○ Adam Tzur   ○○○

■ **DOB: 5 February 1996**
■ **Address: H.No: 1496, Piquen Chivar, Caisua,**
  Anjuna, Bardez, Goa. Pincode: 403509
■ **Email: tzuradam@gmail.com**

■<u>**Brief of your working experience:**</u>
2 years of industrial level experience in ReactJS, NextJS, NodeJS and Sass. Worked with different types of technology stacks.
On my first job as a Junior I led a team of 3 other juniors developed and produced a project using a tech stack which I had learnt while working.
I have experience as a freelancer developing websites using WordPress and even developing websites using basic html, css and javascript.
My most current experience was working with one of India's largest health and fitness related companies (B2C - Business to Consumer). Worked in a team of over 20+ developers.
I have the ability to lead, work in a team, speak directly to clients regarding requirements and expectations. Work and communicate directly with companies CTO's and General Managers regarding projects.

■<u>**Work experience**</u>

2023/02	Joined Turtlemint as a Software Engineer
2022/01	Joined Ajency.in as a Frontend Developer / Software Engineer

■**My strength and selling point.**

Ability to learn any technology stack given and produce results in a short span of time.
Have a plethora of skills which branch outside the field of IT such as soft skills, communication skills to converse with clients, working with photoshop etc. I also have experience working with the AGILE and JIRA work environment.
I have an interest in the IT world and am constantly learning new topics, currently practicing Solidity.
I follow Sodacon Foundation and have even won prizes as big as Apple Watch Series 6 during their Quiz rounds.
A can do attitude and will question everything before starting my work.
I believe in spending more time during the research and planning phase, which allows the execution phase to be much smoother and faster.

■（Technical）skills

OS	Windows 10 Windows 11 MacOS	10 years 1 year 2 years	• Ability to quickly learn the UI and manage all applications. • Troubleshoot and installation of all required development tools.
Language	C C++ JavaScript Java Python Solidity	1 year 1 year 4 years 1 year 6 months Learning phase	• Certified DS&A programming for C and JavaScript. • Certified Advanced Java programming from a reputed college in Bangalore. • Understanding of OOP and POP concepts. • Taught children Python programming language during a job as a Programming teacher in a company called Debugs Bunny. • Learning Solidity and working with Ethereum wallets.
Framework	ReactJS NextJS Express	2 years 2 years 1 year	• Industrial level experience working on one of India's largest ecommerce platforms dealing with 10+ million customers • Revamping of large projects from ReactJS to NextJS • Basic understanding of Express and usage in connecting both front and back ends related to Solidity projects and Ethereum wallets
DB	MySQL workbench MongoDB	1 year Learning phase	• Worked with MySQL for basic database migration and commands for update, delete and truncating of objects. • Learnt the MERN stack from an online course.
Other middleware, servers, etc.	Apache Strapi CMS Bitvise SSH Client AWS (S3, EC2, Lightsail) Photoshop Screaming Frog SEO Web Crawl TailwindCSS, Sass, Bootstrap Google Firebase WordPress Figma Ganache	6 months 1 year 1 year 1 year 2 years 1 year 1 year 3 years 1 year 1 year 2 year Learning phase	• Can set up from installation • In my freelance projects worked with Apache for most projects and usage of Xampp as well • Usage of Photoshop for improvement of images and quality for faster rendering on web pages. • SEO handling for marketing. • AWS for production and dummy projects to be used for clients. • Used Firebase to set up my personal portfolio during my 3rd year in college for interview purposes. • Developed WordPress websites for personal clients during my freelance work.
